UNITED STATES DISTRICT COURT
NORTHERN DISTRICT OF CALIFORNIA

CRB

ORLANDO ARCHUNDE (NM);

Plaintiff,

vs.

PFIZER, INC., PHARMACIA CORPORATION
and G.D. SEARLE, LLC,

Defendants.

Docket No.

CIVIL COMPLAINT

JURY TRIAL DEMANDED

Plaintiff ORLANDO ARCHUNDE, by and through their counsel, bring this action against Defendants PFIZER, INC., PHARMACIA CORP., and G.D. SEARLE & CO. (hereinafter collectively "Defendants") and allege as follows:

I. PARTIES

1. This is an action for damages arising from Defendants' design, manufacture, sale, testing, marketing, advertising, promotion, and/or distribution of the unsafe medication Valdecxib, trade name BEXTRA® ("BEXTRA").

2. Plaintiff ORLANDO ARCHUNDE was at all relevant times adult resident citizens of the State of New Mexico, County of Cibola. Plaintiff ORLANDO ARCHUNDE began ingesting Bextra on or about December 3, 2003. As a direct and proximate result of ingesting BEXTRA,

1 Plaintiff suffered severe cardiovascular injuries while ingesting Bextra, including, but not limited to, a
2 Stroke on July 13, 2004 resulting in hospitalization, which has caused and will continue to cause
3 Plaintiff damages and places Plaintiff at risk of further serious injury or death.

4 3. Defendant Pfizer Inc. ("Pfizer") is a Delaware corporation with its principal place of
5 business in New York, New York. In 2003, Pfizer acquired Pharmacia Corporation for nearly
6 \$60 billion. At all relevant times Pfizer and/or its predecessors in interest were engaged in the
7 business of designing, testing, manufacturing, packaging, marketing, distributing, promoting, and
8 selling the drug Valdecoxib, under the trade name BEXTRA in California and nationwide.

9 4. Defendant G. D. Searle, LLC, formerly known as G. D. Searle & Co. ("Searle") is a
10 Delaware corporation with its principal place of business in Illinois. At all relevant times, Searle has
11 been engaged in the business of marketing and selling BEXTRA nationwide and in California. Searle
12 is a subsidiary of Pfizer, acting as its agent and alter ego in all matters alleged within this Complaint.

13 5. Defendant Pharmacia Corporation ("Pharmacia") is a Delaware corporation with its
14 principal place of business in New Jersey. At all relevant times, Pharmacia, and its predecessors in
15 interest have been engaged in the business of designing, testing, manufacturing, packaging, marketing,
16 distributing, promoting, and selling BEXTRA nationwide and in California.

17 **II. JURISDICTION AND VENUE**

18 6. This is an action for damages, which exceeds seventy-five thousand dollars
19 (\$75,000.00).

20 7. There is complete diversity of citizenship between the Plaintiffs and Defendants. This
21 Court has subject matter jurisdiction over this matter pursuant to 28 U.S.C.A. § 1332 (diversity
22 jurisdiction) because the amount in controversy exceeds \$75,000.00, and because there is complete
23 diversity of citizenship between Plaintiffs and Defendants.

24 8. Venue is proper in this United States Judicial District pursuant to 28 U.S.C.A. § 1391.
25 Defendants marketed, advertised and distributed the dangerous product in the district, thereby
26 receiving substantial financial benefit and profits the dangerous product in this district, and reside in
27 this district under 28 U.S.C.A. § 1391(c), such that venue is proper.

28 9. At all relevant times herein, Defendants were in the business of designing,

1 manufacturing, marketing, developing, testing, labeling, promoting, distributing, warranting and
2 selling their product, BEXTRA. Defendants at all times relevant hereto designed, developed,
3 manufactured, promoted, marketed, distributed, tested, warranted and sold in interstate commerce
4 (including California and Louisiana) the aforementioned prescription drug. Defendants do substantial
5 business in the State of California and within this Federal Judicial District, advertise in this district,
6 receive substantial compensation and profits from sales of BEXTRA in this District, and made
7 material omissions and misrepresentations and breaches of warranties in this District so as to subject
8 them to *in personam* jurisdiction in this District. In engaging in the conduct alleged herein each
9 defendant acted as the agent for each of the other defendants, or those defendant's predecessors in
10 interest.

11 **III. INTERDISTRICT ASSIGNMENT**

12 10. Assignment to the San Francisco Division is proper as this action is related to *In Re:*
13 *Bextra and Celebrex Marketing Sales Prac. and Pro. Liab. Lit.*, MDL-1699, assigned to the Honorable
14 Charles R. Breyer by the Judicial Panel on Multidistrict Litigation on September 6, 2005.

15 **IV. FACTUAL BACKGROUND**

16 **A. Facts Regarding All Plaintiffs**

17 11. Plaintiffs and Plaintiffs' healthcare providers were at the time of Plaintiffs' injuries
18 unaware - and could not have reasonably known or have learned through reasonable diligence - that
19 such injury directly resulted from Defendants' negligent and otherwise culpable acts, omissions, and
20 misrepresentations or from Plaintiffs' ingestion of BEXTRA.

21 12. Plaintiffs used BEXTRA in a proper and reasonably foreseeable manner and used it in a
22 condition that was substantially the same as the condition in which it was manufactured and sold.

23 13. Plaintiffs would not have used BEXTRA had Defendants properly disclosed the risks
24 associated with the drug.

25 **B. Facts Regarding Bextra and Bextra's Market Launch**

26 14. Bextra is one of a class of pain medications called non-steroidal anti-inflammatory
27 drugs ("NSAIDs"). Aspirin, naproxen (trade name Aleve), and ibuprofen (trade name Advil) are
28 examples of well-known NSAIDs.

1 15. NSAIDs reduce pain by blocking the body's production of pain transmission enzymes
2 called cyclo-oxygenase or "COX." There are two forms of COX enzymes—COX-1 and COX-2.
3 Aspirin, naproxen and ibuprofen all act by blocking COX-1 and COX-2 enzymes.

4 16. In addition to decreasing inflammation, the prostaglandins that are supported by COX-1
5 enzymes are involved in the production of gastric mucus; this protects the stomach wall from the
6 hydrochloric acid present in the stomach. It is generally accepted in the medical community that by
7 blocking the COX-1 enzyme, the body's ability to protect gastric tissue is hampered and as a result,
8 can cause harmful gastrointestinal side effects, including stomach ulceration and bleeding.

9 17. Prostaglandin I₂ is the predominant cyclooxygenase product in endothelium, inhibiting
10 platelet aggregation (preventing clot formation), causing vasodilation, and preventing the proliferation
11 of vascular smooth muscle. Whereas older NSAIDs inhibit Thromboxane A₂ and Prostaglandin I₂,
12 the COX-2 inhibitors leave Thromboxane A₂ unaffected. Thromboxane A₂ is a potent platelet
13 aggregator and vasoconstrictor, which is synthesized by platelets. Therefore, while the older NSAIDs
14 suppress platelet aggregation and vasoconstriction, the COX-2 inhibitors support it.

15 18. Traditional NSAIDs like aspirin reduce pain/inflammation and therefore pain by
16 inhibiting both COX-1 and COX-2 enzymes simultaneously. As would be expected, traditional
17 NSAIDs may cause ulcers in the stomach. However, traditional NSAIDs do not cause blood clots,
18 rather they actually reduce the risk of clots and help protect heart function.

19 19. Defendants and other pharmaceutical companies set out to remedy these ulcer and
20 bleeding problems suffered by some NSAID users by developing "selective" inhibitors that would
21 block only COX-2 production, thus (supposedly) allowing the proper maintenance of gastric tissue
22 while still reducing inflammation.

23 20. In making this decision, Defendants and their predecessors in interest either
24 intentionally ignored or recklessly disregarded current medical knowledge that selective COX-2
25 inhibition lowers prostacyclin levels and causes thromboxane A₂ to be uninhibited, causing blood
26 clots, and giving rise to various clot-related cardiovascular events, including heart attack, stroke,
27 unstable angina. The vasoconstriction and fluid retention cause the hypertension.

28 21. Pfizer launched Celebrex, the first of the three major COX-2 inhibitor drugs, in early

1 1999 and initiated a massive marketing campaign to convince doctors and consumers of the superiority
2 of their new “blockbuster” drug over less inexpensive NSAIDs. In May 1999, Merck & Co., Inc.
3 (“Merck”) launched Vioxx, its own selective COX-2 inhibitor.

4 22. Seeking increased market share in this extremely lucrative market, Defendants, and
5 their predecessors in interest, also sought approval of a “second generation” selective COX-2 inhibitor
6 and filed for FDA approval of Bextra on January 16, 2001 for the (i) prevention and treatment of acute
7 pain, (ii) treatment of primary dysmenorrhea, and (iii) relief of the signs and symptoms of
8 osteoarthritis and adult rheumatoid arthritis.

9 23. The FDA granted approval of the new drug on November 16, 2001, for two particular
10 uses: (i) treatment of primary dysmenorrhea and (ii) relief for the signs and symptoms of osteoarthritis
11 and rheumatoid arthritis.

12 24. The FDA did not grant approval to market and promote Bextra for the management or
13 prevention of acute pain.

14 25. The FDA did not grant approval to promote Bextra as more effective than other
15 NSAIDs in preventing clinically serious gastrointestinal events such as perforations, ulcers or gastric
16 bleeding.

17 26. Even without a label that allowed Defendants to legitimately claim superior safety,
18 when Defendants, and their predecessors-in-interest, began marketing Bextra in early 2002,
19 Defendants and their representatives and agents misrepresented the safety profile of Bextra to
20 consumers, including Plaintiff, the medical community, healthcare providers, and third party payers.

21 27. Defendants proceeded to promote, market, sell, and distribute Bextra as a much safer
22 and more effective pain reliever than other NSAIDs, such as aspirin, naproxen, and ibuprofen.

23 **C. Facts Regarding Bextra’s Safety and Defendants’ Knowledge Thereof.**

24 28. The potential for cardiovascular risk of selective COX-2 inhibitors was known to
25 Defendants long before the FDA granted market approval in November 2, 2001. By 1997, and prior to
26 the submission of the New Drug Application (the “NDA”) for Bextra, Defendants was aware that, by
27 inhibiting COX-2, Bextra altered the homeostatic balance between prostacyclin synthesis and
28 thromboxane and thereby, increased the prothrombotic effects of the drugs, causing blood clots to

1 form in those who ingested it. *See* Topol, E.J., *et al.*, *Risk of Cardiovascular Events Associated with*
2 *Selective Cox-2 Inhibitors*, *JAMA*, August 22, 2001 at 954. Although all COX-2 inhibitors have this
3 mechanism of action, Bextra was the most selective COX-2 inhibitor proposed for approval.
4 Accordingly, it had the greatest potential to cause adverse cardiovascular and cerebrovascular events.

5 29. As Pharmacologist, Dr. Garrett Fitzgerald, of the University of Pennsylvania, reported
6 in an editorial published in *The New England Journal of Medicine* on October 21, 2004, that it was
7 known as early as 1999 that selective COX-2 inhibitors, such as Bextra, suppressed the formation of
8 prostaglandin I-2 in healthy volunteers, inhibited platelet aggregation in vitro, and may predispose
9 patients to myocardial infarction or thrombotic stroke.

10 30. Nevertheless, on January 16, 2001, Defendants submitted an NDA to the FDA for
11 Bextra, omitting information about the extent of the risks associated with Bextra. Without a complete
12 picture of the potential hazards associated with the drug, the FDA approved Bextra on or about
13 November 16, 2001.

14 31. Based on the studies performed on Celebrex, Vioxx, Bextra, and other COX-2
15 inhibitors, and basic research on this type of selective inhibitor which had been widely conducted,
16 Defendants knew when Bextra was being developed and tested that selective COX-2 inhibitors posed
17 serious cardiovascular risks for anyone who took them, and presented a specific additional threat to
18 anyone with existing heart disease or cardiovascular risk factors. Studies show that selective COX-2
19 inhibitors, including Bextra, decrease blood levels of a prostacyclin. When those levels fall, the
20 arteries are more vulnerable to clotting, high blood pressure, heart attack, and stroke.

21 32. On December 9, 2004, the FDA issued new information on side effects associated with
22 the use of Bextra and required the addition of certain warnings to, and the strengthening of other
23 warnings on, the Bextra label. The enhanced warnings followed in the wake of the results of
24 additional cardiovascular studies performed by Defendants, as well as numerous complaints to the
25 FDA regarding severe skin reactions.

26 33. Yet well prior to this warning, Defendants had knowledge of the coronary and
27 cardiovascular safety risks of Bextra from several studies. *See e.g.*, Otto, E.O., *Efficacy and Safety of*
28 *the Cyclooxygenase 2 Inhibitors Parecoxib and Valdecoxib in Patients Undergoing Coronary Artery*

1 *Bypass Surgery, The Journal of Thoracic and Cardiovascular Surgery*, June 2003 at 1481.

2 34. Even Defendants' own (and Pfizer funded) post- drug approval meta-analysis study
3 (first presented on March 31, 2003 and again on May 15, 2003) included this data showing an
4 increased cardiovascular risk in patients treated with Bextra after undergoing coronary artery bypass
5 graft surgery. Observed events included heart attack, stroke, and blood clots in the legs and lungs.
6 The results were particularly relevant and striking as each of the study participants who were a post-
7 bypass surgery patient was ingesting anti-clotting agents at the time their exposure to Bextra was being
8 tracked.

9 35. In mid-January 2005, a peer-reviewed paper from the University of Pennsylvania found
10 that in patients having heart bypass surgery, those who took Bextra in the intravenous form, parecoxib,
11 as opposed to a placebo, were three times more likely to have a heart attack or stroke.

12 36. From February 16-18, 2005, the FDA's Drug Safety and Risk Management Advisory
13 Committee and the Arthritis Drug Advisory Committee met jointly to further examine the safety of
14 COX-2 inhibitors. There, FDA Office of Drug Safety Officer David Graham testified that selective
15 COX-2 inhibitors increase the risk for adverse cardiovascular events at about the same rate as cigarette
16 smoking, hypertension, and diabetes.

17 37. Despite years of studies on selective COX-2 inhibitors, as well as the disturbing new
18 studies specifically analyzing the risks of Bextra, Defendants failed to take any action to protect the
19 health and welfare of patients, but instead, continued to promote the drug for sale even after the FDA's
20 Drug Safety and Risk Management Advisory Committee and Arthritis Drug Advisory Committee
21 meetings.

22 38. On April 7, 2005, the FDA finally insisted that Defendants "voluntarily withdraw"
23 Bextra from the U.S. market, stating:

24 " . . . the Agency has concluded that the overall risk versus
25 benefit profile of Bextra is unfavorable. This conclusion is based on the
26 potential increased risk for serious cardiovascular (CV) adverse events,
27 which appears to be a class effect of non-steroidal anti-inflammatory
28 drugs (NSAIDs) (excluding aspirin), an increased risk of serious skin
reactions (e.g. toxic epidermal necrolysis, Stevens-Johnson syndrome,
erythema multiforme) compared to other NSAIDs, and the fact that
Bextra has not been shown to offer any unique advantage over the other
available NSAIDs."

39. FDA Alert for Healthcare Professionals, April 7, 2005.

Continuing, the FDA noted:

“Bextra has been demonstrated to be associated with an increased risk of serious adverse CV events in two short-term trials in patients immediately post-operative from coronary artery bypass graft (CABG) surgery FDA has concluded that it is reasonable to extrapolate the adverse CV risk information for Bextra from the short-term CABG trials to chronic use given the fact that other COX-2 selective NSAIDs have been shown in long-term controlled clinical trials to be associated with an increased risk of serious adverse CV events (e.g., death, MI, stroke), and the well described risk of serious, and often life-threatening gastrointestinal bleeding To date, there have been no studies that demonstrate an advantage of Bextra over other NSAIDs that might offset the concern about the[] serous skin risks, such as studies that show a GI safety benefit, better efficacy compared to other products, or efficacy in a setting of patients who are refractory to treatment with other products.”

40. The scientific data available during and after Bextra’s approval process made clear to Defendants that their formulation of Bextra would cause a higher risk of blood clots, stroke and/or myocardial infarctions among Bextra consumers, alerting them to the need to do additional and adequate safety studies.

41. As stated by Dr. Topol on October 21, 2004, in *The New England Journal of Medicine*, outlining Defendants’ failure to have conducted the necessary trials before marketing to humans “ . . . it is mandatory to conduct a trial specifically assessing cardiovascular risk and benefit of (COX-2 inhibitors). Such a trial needed to be conducted in patients with established coronary artery disease, who frequently have coexisting osteoarthritis requiring medication and have the highest risk of further cardiovascular events.”

42. Dr. Topol was also the author on the study published in August 2001 in JAMA (listed above) that reported an increased risk of thrombotic cardiovascular events in persons who used COX-2 inhibitors.

43. Based upon readily available scientific data, Defendants knew, or should have known, that their pre-approval testing of Bextra did not adequately represent the cross-section of individuals who were intended consumers and therefore, likely to take Bextra. Therefore, Defendants’ testing and studies were grossly inadequate. *See, e.g.*, PDR entry for Bextra (noting that: “**Platelets:** In four

1 clinical studies with young and elderly (≥ 65 years) subjects, single and multiple doses up to 7 day
2 mg BID had no effect on platelet aggregation”).

3 44. Had Defendants done adequate testing prior to approval and “market launch,” rather
4 than the extremely short duration studies done on the small size patient base that was actually done)
5 Pharmacia and Searle’s scientific data would have revealed significant increases in incidence of
6 strokes and myocardial infarctions among the intended and targeted population of Bextra consumers.
7 Adequate testing would have shown that Bextra possessed serious side effects for individuals such as
8 Plaintiff. Defendants should have taken appropriate measures to ensure that their defectively designed
9 product would not be placed in the stream of commerce and/or should have provided full and proper
10 warnings accurately and fully reflecting the scope and severity of symptoms of those side effects
11 should have been made.

12 45. In fact, post-market approval data did reveal increased risks of clotting, stroke and
13 myocardial infarction, but this information was intentionally suppressed by Defendants in order for
14 them to gain significant profits from continued Bextra sales.

15 46. Defendants’ failure to conduct adequate testing and/or additional testing prior to
16 “market launch” was based upon their desire to generate maximum financial gains for themselves and
17 to gain a significant market share in the lucrative multi-billion dollar COX-2 inhibitor market.

18 47. At the time Defendants manufactured, advertised, and distributed Bextra to consumers,
19 Defendants intentionally or recklessly ignored and/or withheld information regarding the increased
20 risks of hypertension, stroke and/or myocardial infarctions because Defendants knew that if such
21 increased risks were disclosed, consumers such as Plaintiffs would not purchase Bextra, but instead
22 would purchase other cheaper and safer NSAIDs.

23 **D. Facts Regarding Defendants’ Marketing and Sale of Bextra**

24 48. Plaintiffs and at all times relevant herein, Defendants engaged in a marketing campaign
25 with the intent that consumers would perceive Bextra as a safer and better drug than its other NSAIDs
26 and, therefore, purchase Bextra.

27 49. Defendants widely and successfully marketed Bextra throughout the United States by,
28 among other things, conducting promotional campaigns that misrepresented the efficacy of Bextra in

1 order to induce a widespread use and consumption. Bextra was represented to aid the pain and
2 discomfort of arthritis, osteoarthritis, and related problems. Defendants made misrepresentations by
3 means of media advertisements, and statements contained in sales literature provided to Plaintiff's
4 prescribing physicians.

5 50. Despite knowledge of the dangers presented by Bextra, Defendants and Defendants'
6 predecessors in interest, through their officers, directors and managing agents for the purpose of
7 increasing sales and enhancing its profits, knowingly and deliberately failed to remedy the known
8 defects of Defendants' product, Bextra, and failed to warn the public, including Plaintiff, of the serious
9 risk of injury occasioned by the defects inherent in Defendants' product, Bextra. Defendants and their
10 officers, agents and managers intentionally proceeded with the inadequate safety testing, and then the
11 manufacturing, sale and marketing of Defendants' product, Bextra, knowing that persons would be
12 exposed to serious potential danger, in order to advance their own pecuniary interests. Defendants'
13 conduct was wanton and willful, and displayed a conscious disregard for the safety of the public and
14 particularly of Plaintiff.

15 51. In an elaborate and sophisticated manner, Defendants aggressively marketed Bextra
16 directly to consumers and medical professionals (including physicians and leading medical scholars) in
17 order to leverage pressure on third party payers, medical care organizations, and large institutional
18 buyers (*e.g.*, hospitals) to include Bextra on their formularies. Faced with the increased demand for
19 the drug by consumers and health care professionals that resulted from Defendants' successful
20 advertising and marketing blitz, third party payers were compelled to add Bextra to their formularies.
21 Defendants' marketing campaign specifically targeted third party payers, physicians, and consumers,
22 and was designed to convince them of both the therapeutic and economic value of Bextra.

23 52. Defendants represented that Bextra was similar to ibuprofen and naproxen but was
24 superior because it lacked any of the common gastrointestinal adverse side effects associated with
25 these and other non-steroidal anti-inflammatory drugs ("NSAIDS"). For instance, NSAIDS can, in
26 certain patients, cause gastrointestinal perforations, ulcers and bleeding with long-term use.
27 Defendants promoted Bextra as a safe and effective alternative that would not have the same
28 deleterious and painful impact on the gut, but that would be just as effective, if not more so, for pain

1 relief.

2 53. Bextra possessed dangerous and concealed or undisclosed side effects, including the
3 increased risk of serious cardiovascular events, such as heart attacks, unstable angina, cardiac clotting,
4 deep vein thrombosis, hypertension, and cerebrovascular events, such as strokes. In addition, Bextra
5 was no more effective than traditional and less expensive NSAIDs and, just like traditional NSAIDs,
6 carried a risk of perforations, ulcers, and gastrointestinal bleeding. Defendants chose not to warn
7 about these risks and dangers.

8 54. Defendants knew of these risks before the U.S. Food and Drug Administration (the
9 “FDA”) approved Bextra for sale on November 16, 2001, but Defendants ignored, downplayed,
10 suppressed, omitted, and concealed these serious safety risks and denied inefficacy in its promotion,
11 advertising, marketing, and sale of Bextra. Defendants’ omission, suppression, and concealment of
12 this important information enabled Bextra to be sold to, and purchased, or paid for by, the Consumers
13 at a grossly inflated price.

14 55. Consequently, Bextra captured a large market share of anti-inflammatory drugs
15 prescribed for and used by patients. In 2002 alone (after a drug launch in March of 2002), sales of
16 Bextra exceeded \$1.5 billion, despite the significantly higher cost of Bextra as compared to other pain
17 relievers in the same family of drugs.

18 56. It was not until April 7, 2005, that Defendants finally acknowledged Bextra’s
19 deleterious side effects and announced that they were withdrawing the drug from the worldwide
20 market based on what it misleadingly termed “new” and “unexpected” evidence linking Bextra to an
21 increased risk of heart attacks and strokes.

22 57. Had Defendants done adequate testing prior to approval and “market launch,”
23 Pharmacia’s scientific data would have revealed significant increases in stroke and myocardial
24 infarction amongst the intended population of BEXTRA consumers. Adequate testing would have
25 shown that BEXTRA possessed serious side effects. Defendants should have taken appropriate
26 measures to ensure that their defectively designed product would not be placed in the stream of
27 commerce and/or should have provided full and proper warnings accurately and fully reflecting the
28 scope and severity of symptoms of those side effects should have been made.

1 58. In fact, post-market approval data did reveal increased risks of clotting, stroke and
2 myocardial infarction, but this information was intentionally suppressed by Defendants in order for
3 them to gain significant profits from continued BEXTRA sales.

4 59. Defendants' failure to conduct adequate testing and/or additional testing prior to
5 "market launch" was based upon their desire to generate maximum financial gains for themselves and
6 to gain a significant market share in the lucrative multi-billion dollar COX-2 inhibitor market.

7 60. At the time Defendants manufactured, advertising, and distributed BEXTRA to
8 consumers, Defendants intentionally or recklessly ignored and/or withheld information regarding the
9 increased risks of hypertension, stroke and/or myocardial infarctions because Defendants knew that if
10 such increased risks were disclosed, consumers such as Plaintiffs would not purchase BEXTRA, but
11 instead would purchase other cheaper and safer NSAID drugs.

12 61. At all times relevant herein, Defendants engaged in a marketing campaign with the
13 intent that consumers, including plaintiff, and their doctors would perceive BEXTRA as a better drug
14 than its competitors and, therefore, purchase BEXTRA.

15 62. Defendants widely and successfully marketed BEXTRA throughout the United States
16 by, among other things, conducting promotional campaigns that misrepresented the efficacy of
17 BEXTRA in order to induce a widespread use and consumption. BEXTRA was represented to aid the
18 pain and discomfort of arthritis, osteoarthritis, and related problems. Defendants made
19 misrepresentations by means of media advertisements, and statements contained in sales literature
20 provided to Plaintiff's prescribing physicians.

21 63. Prior to manufacturing, sale and distribution of BEXTRA, Defendants, through their
22 officers, director and managing agents, had notice and knowledge from several sources, that BEXTRA
23 presented substantial and unreasonable risks of harm to the consumer. As such, BEXTRA consumers,
24 including Plaintiff, were unreasonably subject to risk of injury or death from the consumption of
25 Defendants' product, BEXTRA.

26 64. Despite such knowledge, Defendants and Defendants' predecessors in interest, through
27 their officers, directors and managing agents for the purpose of increasing sales and enhancing its
28 profits, knowingly and deliberately failed to remedy the known defects of Defendants' product,

BEXTRA, and failed to warn the public, including Plaintiffs, of the serious risk of injury occasioned by the defects inherent in Defendants' product, BEXTRA. Defendants and their officers, agents and managers intentionally proceeded with the inadequate testing, and then the manufacturing, sale and marketing of Defendants' product, BEXTRA, knowing that persons would be exposed to serious potential danger, in order to advance their own pecuniary interests. Defendants' conduct was wanton and willful, and displayed a conscious disregard for the safety of the public and particularly of Plaintiff.

CLAIMS FOR RELIEF

FIRST CLAIM FOR RELIEF

Negligence

65. Plaintiffs incorporate by reference all previous paragraphs of this Complaint as if fully set forth herein and further allege as follows.

66. Defendants owed Plaintiffs a duty to exercise reasonable care when designing, manufacturing, marketing, advertising, distributing, and selling BEXTRA. This duty included the duty not to introduce a pharmaceutical drug, such as BEXTRA, into the stream of commerce that caused users to suffer from unreasonable, dangerous or untoward adverse side effects.

67. At all relevant times to this action, Defendants owed a duty to properly warn Plaintiffs and the Public of the risks, dangers and adverse side effects of their pharmaceutical drug BEXTRA.

68. Defendants breached their duties by failing to exercise ordinary care in the preparation, design, research, testing, development, manufacturing, inspection, labeling, marketing, promotion, advertising and selling of BEXTRA, including: failing to use due care in the preparation and development of BEXTRA to prevent the aforementioned risk of injuries to individuals when the drugs were ingested;

a. failing to use due care in the design of BEXTRA to prevent the aforementioned risk of injuries to individuals when the drugs were ingested;

b. failing to conduct adequate pre-clinical testing and research to determine the safety of BEXTRA;

c. failing to conduct adequate post-marketing surveillance and exposure studies to

1 determine the safety of BEXTRA;

2 d. failing to completely, accurately and in a timely fashion, disclose the results of
3 the pre-marketing testing and post-marketing surveillance and testing to Plaintiffs, consumers, the
4 medical community, and the FDA;

5 e. failing to accompany BEXTRA with proper warnings regarding all possible
6 adverse side effects associated with the use of BEXTRA;

7 f. failing to use due care in the manufacture, inspection, and labeling of BEXTRA
8 to prevent the aforementioned risk of injuries to individuals who used BEXTRA;

9 g. failing to use due care in the promotion of BEXTRA to prevent the
10 aforementioned risk of injuries to individuals when the drugs were ingested;

11 h. failing to use due care in the sale and marketing of BEXTRA to prevent the
12 aforementioned risk of injuries to individuals when the drugs were ingested;

13 i. failing to use due care in the selling of BEXTRA to prevent the aforementioned
14 risk of injuries to individuals when the drugs were ingested;

15 j. failing to provide adequate and accurate training and information to the sales
16 representatives who sold BEXTRA;

17 k. failing to provide adequate and accurate training and information to healthcare
18 providers for the appropriate use of BEXTRA; and

19 l. being otherwise reckless, careless and/or negligent.

20 69. Despite the fact that Defendants knew or should have known that BEXTRA caused
21 unreasonable and dangerous side effects which many users would be unable to remedy by any means,
22 Defendants continued to promote and market BEXTRA to consumers, including Plaintiffs, when safer
23 and more effective methods of pain relief were available.

24 70. Defendants were, or should have been, had they exercised reasonable care, in
25 possession of evidence demonstrating that BEXTRA caused serious side effects. Nevertheless, they
26 continued to market their products by providing false and misleading information with regard to the
27 safety and efficacy of BEXTRA.

28 71. Defendants knew or should have known that consumers such as Plaintiffs would

foreseeably suffer injury as a result of their failure to exercise ordinary care as described above.

72. As a direct and proximate consequence of Defendants' acts, omissions, and misrepresentations described herein, Plaintiffs sustained serious injuries and related losses. Plaintiffs required and will continue to require healthcare and services. Plaintiffs have incurred and will continue to incur medical and related expenses. Plaintiffs also have suffered and will continue to suffer mental anguish, physical pain and suffering, diminished capacity for the enjoyment of life, a diminished quality of life, increased risk of premature death, aggravation of preexisting conditions and activation of latent conditions, and other losses and damages. Plaintiffs also incurred direct medical losses and costs include care for hospitalization, physician care, monitoring, treatment, medications, and supplies. Plaintiffs have also suffered loss of wages.

73. Defendants' conduct was committed with knowing, conscious, wanton, willful, and deliberate disregard for the value of human life and the rights and safety of consumers, including Plaintiffs, thereby entitling Plaintiffs to punitive and exemplary damages so as to punish Defendants and deter them from similar conduct in the future.

74. WHEREFORE, Plaintiffs demand judgment against Defendants and seek compensatory damages, and exemplary and punitive damages together with interest, the costs of suit and attorneys' fees and such other and further relief as this Court deems just and proper.

SECOND CLAIM FOR RELIEF

Strict Liability

75. Plaintiffs incorporate by reference all previous paragraphs of this Complaint as if fully set forth herein and further allege as follows.

76. At all times relevant to this action, Defendants were suppliers of BEXTRA, placing the drug into the stream of commerce. BEXTRA was expected to and did reach Plaintiffs without substantial change in the condition in which it was manufactured and sold.

77. BEXTRA was unsafe for normal or reasonably anticipated use.

78. BEXTRA was defective in design or formulation because when it left the hands of the manufacturer and/or supplier, it was unreasonably dangerous and more dangerous than an ordinary consumer would expect. BEXTRA was also defective and unreasonably dangerous in that the

1 foreseeable risk of injuries from BEXTRA exceeded the benefits associated with the design and/or
2 formulation of the product.

3 79. Bextra is unreasonably dangerous: a) in construction or composition as provided in R.S.
4 9:2800.55; b) in design as provided in R.S. 9:2800.56; c) because an adequate warning about the
5 product was not provided as required by R.S. 9:2800.57; d) because it does not conform to an express
6 warranty of the manufacturer about the product as provided in R.S. 9:2800.58.

7 80. The characteristics of Bextra that render it unreasonably dangerous under R.S.
8 9:2800.55, et seq., existed at the time the product left the control of the manufacturer or
9 resulted from a reasonably anticipated alteration or modification of the product.

10 81. The BEXTRA manufactured and supplied by Defendants was also defective due to
11 inadequate warnings, and/or inadequate clinical trials, testing and study, and inadequate reporting
12 regarding the results of the clinical trials, testing and study. Defendants failed to perform adequate
13 testing before exposing Plaintiffs to the medication, testing which would have shown that BEXTRA
14 had the potential to cause serious side effects including strokes like that which affected Plaintiffs.

15 82. The BEXTRA manufactured and supplied by Defendants was defective due to
16 inadequate post-marketing warnings or instructions because, after Defendants knew or should have
17 known of the risk of injuries from BEXTRA, they failed to provide adequate warnings to the medical
18 community and the consumers, to whom they were directly marketing and advertising BEXTRA; and,
19 further, it continued to affirmatively promote BEXTRA as safe and effective.

20 83. BEXTRA was manufactured, distributed, tested, sold, marketed, advertised and
21 promoted defectively by Defendants, and as a direct and proximate cause of Defendants' defective
22 design of BEXTRA, Plaintiffs used BEXTRA rather than other safer and cheaper NSAIDs. As a
23 result, Plaintiffs suffered the personal injuries described above.

24 84. Information given by Defendants to the medical community and to the consumers
25 concerning the safety and efficacy of BEXTRA, especially the information contained in the
26 advertising and promotional materials, did not accurately reflect the potential side effects of BEXTRA.

27 85. Had adequate warnings and instructions been provided, Plaintiffs would not have taken
28 BEXTRA as they did, and would not have been at risk of the harmful side effects described herein.

1 86. Defendants acted with conscious and deliberate disregard of the foreseeable harm
2 caused by BEXTRA.

3 87. Plaintiffs could not, through the exercise of reasonable care, have discovered
4 BEXTRA's defects or perceived the dangers posed by the drug.

5 88. As a direct and proximate consequence of Defendants' acts, omissions, and
6 misrepresentations described herein, Plaintiffs sustained serious injuries and related losses. Plaintiffs
7 required and will continue to require healthcare and services. Plaintiffs have incurred and will
8 continue to incur medical and related expenses. Plaintiffs also have suffered and will continue to
9 suffer mental anguish, physical pain and suffering, diminished capacity for the enjoyment of life, a
10 diminished quality of life, increased risk of premature death, aggravation of preexisting conditions and
11 activation of latent conditions, and other losses and damages. Plaintiffs also incurred direct medical
12 losses and costs include care for hospitalization, physician care, monitoring, treatment, medications,
13 and supplies. Plaintiffs have also suffered loss of wages.

14 89. Defendants' conduct was committed with knowing, conscious, wanton, willful, and
15 deliberate disregard for the value of human life and the rights and safety of consumers, including
16 Plaintiffs, thereby entitling Plaintiffs to punitive and exemplary damages so as to punish Defendants
17 and deter them from similar conduct in the future.

18 90. WHEREFORE, Plaintiffs demand judgment against Defendants and seek compensatory
19 damages, and punitive and exemplary damages together with interest, the costs of suit and attorneys'
20 fees and such other and further relief as this Court deems just and proper.

21 **THIRD CLAIM FOR RELIEF**

22 **Breach of Express Warranty**

23 91. Plaintiffs incorporate by reference all previous paragraphs of this Complaint as if fully
24 set forth herein and further allege as follows.

25 92. Defendants expressly represented to Plaintiffs and other consumers and the medical
26 community that BEXTRA was safe and fit for its intended purposes, that it was of merchantable
27 quality, that it did not produce any dangerous side effects, particularly any unwarned-of side effects,
28 and that it was adequately tested.

1 93. These warranties came in the form of:

- 2 a. Defendants' public written and verbal assurances of the safety and efficacy of
3 BEXTRA;
- 4 b. Press releases, interviews and dissemination via the media of promotional
5 information, the sole purpose of which was to create an increased demand for BEXTRA, which failed
6 to warn of the risk of injuries inherent to the ingestion of BEXTRA, especially to the long-term
7 ingestion of BEXTRA;
- 8 c. Verbal and written assurances made by Defendants regarding BEXTRA and
9 downplaying the risk of injuries associated with the drug;
- 10 d. False and misleading written information, supplied by Defendants, and
11 published in the Physician's Desk Reference on an annual basis, upon which physicians relied in
12 prescribing BEXTRA during the period of Plaintiffs' ingestion of BEXTRA, and;
- 13 e. advertisements.

14 94. The documents referred to above were created by and at the direction of Defendants.

15 95. Defendants knew or had reason to know that BEXTRA did not conform to these
16 express representations in that BEXTRA is neither as safe nor as effective as represented, and that
17 BEXTRA produces serious adverse side effects.

18 96. BEXTRA did not and does not conform to Defendants' express representations because
19 it is not safe, has numerous and serious side effects, including unwarned-of side effects, and causes
20 severe and permanent injuries.

21 97. Plaintiffs, other consumers, and the medical community relied upon Defendants'
22 express warranties.

23 98. As a direct and proximate consequence of Defendants' acts, omissions, and
24 misrepresentations described herein, Plaintiffs sustained serious injuries and related losses. Plaintiffs
25 required and will continue to require healthcare and services. Plaintiffs have incurred and will
26 continue to incur medical and related expenses. Plaintiffs also have suffered and will continue to
27 suffer mental anguish, physical pain and suffering, diminished capacity for the enjoyment of life, a
28 diminished quality of life, increased risk of premature death, aggravation of preexisting conditions and

1 activation of latent conditions, and other losses and damages. Plaintiffs also incurred direct medical
2 losses and costs include care for hospitalization, physician care, monitoring, treatment, medications,
3 and supplies. Plaintiffs have also suffered loss of wages.

4 99. Defendants' conduct was committed with knowing, conscious, wanton, willful, and
5 deliberate disregard for the value of human life and the rights and safety of consumers, including
6 Plaintiffs, thereby entitling Plaintiffs to punitive and exemplary damages so as to punish Defendants
7 and deter them from similar conduct in the future.

8 100. WHEREFORE, Plaintiffs demand judgment against Defendants and seek compensatory
9 damages, and punitive and exemplary damages together with interest, the costs of suit and attorneys'
10 fees and such other and further relief as this Court deems just and proper.

11 **FOURTH CLAIM FOR RELIEF**

12 **Breach of Implied Warranty**

13 101. Plaintiffs incorporate by reference all previous paragraphs of this Complaint as if fully
14 set forth herein and further allege as follows.

15 102. Defendants manufactured, distributed, advertised, promoted, and sold BEXTRA.

16 103. At all relevant times, Defendants knew of the use for which BEXTRA was intended
17 and impliedly warranted the product to be of merchantable quality and safe and fit for such use.

18 104. Defendants were aware that consumers, including Plaintiffs, would use BEXTRA for
19 treatment of pain and inflammation and for other purposes.

20 105. Plaintiffs and the medical community reasonably relied upon Defendants' judgment and
21 expertise to only sell them or allow them to prescribe BEXTRA only if it was indeed of merchantable
22 quality and safe and fit for its intended use. Consumers, including Plaintiffs, and the medical
23 community, reasonably relied upon Defendants' implied warranty for BEXTRA.

24 106. BEXTRA reached consumers, including Plaintiffs, without substantial change in the
25 condition in which it was manufactured and sold by Defendants.

26 107. Defendants breached their implied warranty to consumers, including Plaintiffs;
27 BEXTRA was not of merchantable quality or safe and fit for its intended use.

28 108. As a direct and proximate consequence of Defendants' acts, omissions, and

1 misrepresentations described herein, Plaintiffs sustained serious injuries and related losses. Plaintiffs
2 required and will continue to require healthcare and services. Plaintiffs have incurred and will
3 continue to incur medical and related expenses. Plaintiffs also have suffered and will continue to
4 suffer mental anguish, physical pain and suffering, diminished capacity for the enjoyment of life, a
5 diminished quality of life, increased risk of premature death, aggravation of preexisting conditions and
6 activation of latent conditions, and other losses and damages. Plaintiffs also incurred direct medical
7 losses and costs include care for hospitalization, physician care, monitoring, treatment, medications,
8 and supplies. Plaintiffs have also suffered loss of wages.

9 109. Defendants' conduct was committed with knowing, conscious, wanton, willful, and
10 deliberate disregard for the value of human life and the rights and safety of consumers, including
11 Plaintiffs, thereby entitling Plaintiffs to punitive and exemplary damages so as to punish Defendants
12 and deter them from similar conduct in the future.

13 110. WHEREFORE, Plaintiffs demand judgment against Defendants and seek compensatory
14 damages and punitive and exemplary damages together with interest, the costs of suit and attorneys'
15 fees, and such other and further relief as this Court deems just and proper.

16 **FIFTH CLAIM FOR RELIEF**

17 **Fraudulent Misrepresentation & Concealment**

18 111. Plaintiffs incorporate by reference all previous paragraphs of this Complaint as if fully
19 set forth herein and further allege as follows.

20 112. Defendants' superior knowledge and expertise, their relationship of trust and
21 confidence with doctors and the public, their specific knowledge regarding the risks and dangers of
22 BEXTRA, and their intentional dissemination of promotional and marketing information about
23 BEXTRA for the purpose of maximizing its sales, each gave rise to the affirmative duty to
24 meaningfully disclose and provide all material information about BEXTRA's risks and harms to
25 doctors and consumers.

26 113. Defendants made fraudulent affirmative misrepresentations with respect to BEXTRA in
27 the following particulars:

28 a. Defendants represented through their labeling, advertising, marketing materials,

1 detail persons, seminar presentations, publications, notice letters, and regulatory submissions that
2 BEXTRA had been tested and found to be safe and effective for the treatment of pain and
3 inflammation; and

4 b. Defendants represented that BEXTRA was safer than other alternative
5 medications.

6 114. Defendants made affirmative misrepresentations; and fraudulently, intentionally and/or
7 recklessly concealed material adverse information regarding the safety and effectiveness of BEXTRA.

8 115. Defendants made these misrepresentations and actively concealed adverse information
9 at a time when Defendants knew or had reason to know that BEXTRA had defects and was
10 unreasonably dangerous and was not what Defendants had represented to the medical community, the
11 FDA and the consuming public, including Plaintiffs.

12 116. Defendants omitted, suppressed and/or concealed material facts concerning the dangers
13 and risk of injuries associated with the use of BEXTRA including, but not limited to, the
14 cardiovascular, cerebrovascular, and other serious health risks. Furthermore, Defendants' purpose was
15 willfully blind to, ignored, downplayed, avoided, and/or otherwise understated the serious nature of
16 the risks associated with the use of BEXTRA in order to increase its sales.

17 117. The representations and concealment were undertaken by Defendants with an intent
18 that doctors and patients, including Plaintiffs, rely upon them.

19 118. Defendants' representations and concealments were undertaken with the intent of
20 defrauding and deceiving Plaintiffs, other consumers, and the medical community to induce and
21 encourage the sale of BEXTRA.

22 119. Defendants' fraudulent representations evinced their callous, reckless, willful, and
23 depraved indifference to the health, safety, and welfare of consumers, including Plaintiffs.

24 120. Plaintiffs' physician and Plaintiffs relied on and were induced by Defendants'
25 misrepresentations, omissions, and/or active concealment of the dangers of BEXTRA in selecting
26 BEXTRA treatment.

27 121. Plaintiffs and the treating medical community did not know that the representations
28 were false and were justified in relying upon Defendants' representations.

1 122. Had Plaintiffs been aware of the increased risk of side effects associated with BEXTRA
2 and the relative efficacy of BEXTRA compared with other readily available medications, Plaintiffs
3 would not have taken BEXTRA as he did.

4 123. As a direct and proximate consequence of Defendants' acts, omissions, and
5 misrepresentations described herein, Plaintiffs sustained serious injuries and related losses. Plaintiffs
6 required and will continue to require healthcare and services. Plaintiffs have incurred and will
7 continue to incur medical and related expenses. Plaintiffs also have suffered and will continue to
8 suffer mental anguish, physical pain and suffering, diminished capacity for the enjoyment of life, a
9 diminished quality of life, increased risk of premature death, aggravation of preexisting conditions and
10 activation of latent conditions, and other losses and damages. Plaintiffs also incurred direct medical
11 losses and costs include care for hospitalization, physician care, monitoring, treatment, medications,
12 and supplies. Plaintiffs have also suffered loss of wages.

13 124. Defendants' conduct was committed with knowing, conscious, wanton, willful, and
14 deliberate disregard for the value of human life and the rights and safety of consumers, including
15 Plaintiffs, thereby entitling Plaintiffs to punitive and exemplary damages so as to punish Defendants
16 and deter them from similar conduct in the future.

17 125. WHEREFORE, Plaintiffs demand judgment against Defendants and seek compensatory
18 damages, and punitive and exemplary damages together with interest, the costs of suit and attorneys'
19 fees, and such other and further relief as this Court deems just and proper.

20 **SIXTH CLAIM FOR RELIEF**

21 **Unjust Enrichment**

22 126. Plaintiffs incorporate by reference all previous paragraphs of this Complaint as if fully
23 set forth herein and further allege as follows.

24 127. At all times relevant to this action, Defendants were the manufacturers, sellers, and/or
25 suppliers of BEXTRA.

26 128. Plaintiffs paid for BEXTRA for the purpose of managing their pain safely and
27 effectively.

28 129. Defendants have accepted payment from Plaintiffs for the purchase of BEXTRA.

1 130. Plaintiffs did not receive the safe and effective pharmaceutical product for which she
2 paid.

3 131. It is inequitable and unjust for Defendants to retain this money because Plaintiffs did
4 not in fact receive the product Defendant represented BEXTRA to be.

5 132. WHEREFORE, Plaintiffs demand judgment against Defendants and seeks equitable
6 relief, the costs of suit and attorneys' fees, and such other and further relief as this Court deems just
7 and proper.

8 **SEVENTH CLAIM FOR RELIEF**
9 **(Unjust Enrichment)**

10 133. Plaintiff ORLANDO ARCHUNDE incorporates by reference the preceding paragraphs
11 as if they were fully set forth herein.

12 134. Defendants had a statutory duty to refrain from unfair or deceptive acts or practices in
13 the sale and promotion of BEXTRA to Plaintiff.

14 135. Defendants engaged in unfair, unconscionable, deceptive, fraudulent and misleading
15 acts or practices in violation of all California's consumer protection laws, identified below. Through
16 its false, untrue and misleading promotion of BEXTRA, Defendants induced Plaintiff to purchase
17 and/or pay for the purchase of BEXTRA. Defendants misrepresented the alleged benefits and
18 characteristics of BEXTRA; suppressed, concealed and failed to disclose material information
19 concerning known adverse effects of BEXTRA; misrepresented and advertised that BEXTRA was of a
20 particular standard, quality or grade that it was not; misrepresented BEXTRA in such a manner that
21 later, on disclosure of the true facts, there was a likelihood that Plaintiff would have switched from
22 BEXTRA to another NSAID and/or chosen not to purchase and/or reimburse for purchases of
23 BEXTRA; advertised BEXTRA with the intent not to sell it as advertised; and otherwise engaged in
24 fraudulent and deceptive conduct.

25 136. Defendants' conduct created a likelihood of, and in fact caused, confusion and
26 misunderstanding. Defendants' conduct misled, deceived and damaged Plaintiff and Defendants'
27 fraudulent, misleading and deceptive conduct was perpetrated with an intent that Plaintiff rely on said
28

1 conduct by purchasing and/or paying for purchases of BEXTRA. Moreover, Defendants knowingly
2 took advantage of Plaintiff who was reasonably unable to protect their interests due to ignorance of the
3 harmful adverse effects of BEXTRA. Defendants' conduct was willful, outrageous, immoral,
4 unethical, oppressive, unscrupulous, unconscionable and substantially injurious to Plaintiff and
5 offends the public conscience.

6 137. Plaintiff purchased primarily for personal, family or household purposes.

7 138. As a result of Defendants' violative conduct, Plaintiff purchased and/or paid for
8 purchases of BEXTRA that were not made for resale.

9 139. Defendants engaged in unfair competition or deceptive acts or practices in violation of
10 N.M. Stat. Ann. § 57-12-1, et seq.

11 140. As a proximate result of Defendants' misrepresentations and omissions, Plaintiff has
12 suffered ascertainable losses, in an amount to be determined at trial.

13 141. Throughout the period described in this Complaint, Defendants repeatedly engaged in
14 intentional misconduct characterized by trickery, deceit and a wanton, in so conducting itself, acted
15 with oppression, fraud, and malice toward the Plaintiff, As a result of Defendant's indifference to an
16 reckless disregard of the health and safety of BEXTRA patients, they suffered both physical and
17 economic harm, and all end-payors incurred economic damages. Accordingly, Defendants' conduct
18 was highly reprehensible under controlling Supreme Court punitive damages authority, and the
19 Plaintiff is entitled to punitive and/or exemplary damages.

20 142. As a direct and proximate consequence of Defendants' acts, omissions, and
21 misrepresentations described herein, the Plaintiff, sustained serious cardiovascular injuries; has
22 required and will require healthcare and services; has incurred and will continue to incur medial and
23 related expenses; has suffered loss of wages and a diminished capacity to earn wages in the future; has
24 suffered and will continue to suffer mental anguish, diminished capacity for the enjoyment of life, a
25 diminished quality of life, increased risk of premature death, aggravation of preexisting conditions and
26 activation of latent conditions, and other such damages. Plaintiff's direct medical losses and costs
27
28

1 include care for hospitalization, physician care, monitoring, treatment, medications, and supplies.
2 Plaintiff will continue to incur such losses in the future.

3 143. Defendants' conduct was committed with knowing, conscious, wanton, willful, and
4 deliberate disregard for the value of human life and the rights and safety of consumers, including
5 Plaintiff, thereby entitling Plaintiff to punitive and exemplary damages so as to punish Defendants and
6 deter them from similar conduct in the future.
7

8 **PRAYER FOR RELIEF**

9 WHEREFORE, Plaintiffs request the following relief:

- 10 1. General damages in excess of the jurisdictional amount of this Court;
11 2. Consequential damages;
12 3. Disgorgement of profits;
13 4. Restitution;
14 5. Damages for loss of consortium, care, comfort, society and companionship in an
15 amount within the jurisdiction of this Court and according to proof;
16 6. Punitive and exemplary damages;
17 7. Pre-judgment and post-judgment interest as provided by law;
18 8. Recovery of Plaintiffs' costs including, but not limited to, discretionary Court costs of
19 these causes, and those costs available under the law, as well as expert fees and attorneys' fees and
20 expenses, and costs of this action; and
21 9. Such other and further relief as the Court deems just and proper.
